

1.Java Intro:

```
class Intro {  
    public static void main(String[] args) {  
        System.out.println("Hello Java");  
    }  
}
```

2.Java Get Started:

```
public class GetStarted {  
    public static void main(String[] args) {  
        System.out.println("Hello World");  
    }  
}
```

3.Java Syntax:

```
public class SyntaxDemo {  
    public static void main(String[] args) {  
        int a = 10;  
        System.out.println(a);  
    }  
}
```

4.Java Input :

```
public class SyntaxDemo {  
    public static void main(String[] args) {  
        int a = 10;  
        System.out.println(a);  
    }  
}
```

5.Java Output :

```
Output
Enter your name: Romen Paul
Hello Iam Romen Paul

=== Code Execution Successful ===
```

6.Java comment:

```
public class Main {

    public static void main(String[] args) {
        // This prints Hello World
        System.out.println("Hello World");
    }
}
```

7.Java Variable:

```
public class VariablesDemo {
    public static void main(String[] args) {
        int x = 5;
        System.out.println(x);
    }
}
```

8.Java Data Types:

```
public class Main {
    public static void main(String[] args) {
        int num 25;
        double price 5.75;
        char grade "A":
```

```
boolean status true;
```

```
System.out.println("Integer value: num);
```

```
System.out.println("Double value: price);
```

```
System.out.println("Character value:" grade):
```

```
System.out.println("Boolean value: status):
```

```
}
```

9.Java Type Casting:

```
public class TypeCastingDemo {  
    public static void main(String[] args) {  
        int x = 10;  
        double y = x; // widening  
  
        double d = 9.7;  
        int n = (int) d;  
  
        System.out.println(y);  
        System.out.println(n);  
    }  
}
```

10.Java Operator:

```
public class OperatorsDemo {  
    public static void main(String[] args) {  
        int a = 5, b = 2;  
        System.out.println(a + b);  
        System.out.println(a * b);  
    }  
}
```

11. Java Strings

```
public class StringsDemo {  
    public static void main(String[] args) {  
        String text = "Hello";  
        System.out.println(text.length());  
    }  
}
```

12. Java Math

```
public class MathDemo {  
    public static void main(String[] args) {  
        System.out.println(Math.max(5, 10));  
        System.out.println(Math.sqrt(25));  
    }  
}
```

13. Java Booleans

```
public class BooleanDemo {  
    public static void main(String[] args) {  
        boolean isTrue = (5 > 3);  
        System.out.println(isTrue);  
    }  
}
```

14. Java If...Else

```
public class IfElseDemo {  
    public static void main(String[] args) {  
        int x = 10;  
        if (x > 5) {  
            System.out.println("Greater");  
        } else {  
            System.out.println("Smaller");  
        }  
    }  
}
```

```
    }  
  }  
}
```

15. Java Switch

```
public class SwitchDemo {  
    public static void main(String[] args) {  
        int day = 2;  
  
        switch(day) {  
            case 1: System.out.println("Sat"); break;  
            case 2: System.out.println("Sun"); break;  
            default: System.out.println("Other");  
        }  
    }  
}
```

16. Java While Loop

```
public class WhileDemo {  
    public static void main(String[] args) {  
        int i = 1;  
        while(i <= 3) {  
            System.out.println(i);  
            i++;  
        }  
    }  
}
```

17. Java For Loop

```
public class ForDemo {  
    public static void main(String[] args) {  
        for(int i = 1; i <= 3; i++) {  
            System.out.println(i);  
        }  
    }  
}
```

```
    }  
  }  
}
```

18. Java Break/Continue

```
public class BreakContinueDemo {  
    public static void main(String[] args) {  
        for(int i = 1; i <= 5; i++) {  
            if(i == 3) continue;  
            System.out.println(i);  
        }  
    }  
}
```

19. Java Arrays

```
public class ArraysDemo {  
    public static void main(String[] args) {  
        int[] arr = {10, 20, 30};  
  
        for(int i = 0; i < arr.length; i++) {  
            System.out.println(arr[i]);  
        }  
    }  
}
```
